Benko Products, Inc is a recognized leader in industrial heating technology, with over 30 years of oven manufacturing experience and thousands of ovens operating successfully in the field.

Benko Products combines industry expertise with high quality products and excellent customer service to deliver a complete heating solution.
Each **Sahara Industrial Oven** is designed for ease of use and reliable performance in the harshest environments.

"We custom build each industrial oven to our customer’s specification because there is no size that is universal to everyone. Each application is unique," says John Benko, President of Benko Products. "We proudly engineer our industrial ovens to the highest standards and give you the exact product that you need at the price you need. That is why nobody beats Benko."

Benko Product’s innovative manufacturing process enables cost effective modification to basic oven designs so that the right oven is supplied every time.

Standard Features
The Sahara Industrial Batch Oven has many unique features:
- Custom-built to your specifications
- Precise temperature control, including a thermocouple actuated PID digital temperature controller and adjustable PID digital over temperature protection
- Motor control push buttons
- On-off heat switch
- LED pilot lights
- 2-year Manufacturer’s warranty.

Materials of Construction
Rugged, steel construction includes:
- 12 gauge interior walls and 14 gauge exterior walls
- Integrated framing and structural members ensure toughness
- 304 stainless steel construction available

Insulation
3” to 6” thick, 6# density mineral wool

Heating Medium
- Electricity or Gas
- Steam, hot oil, or hot water models available.

Temperature Range
Room temperature to 500°F (Ratings for 650°F or 800°F optional)

Air Circulation
- Air circulation with internal plenums for uniform airflow within the oven.
- Custom arrangements per application

Finish
- Exterior finished with acrylic enamel or corrosion resistant urethane system
- Interior finished with heat resistant silver
- Stainless steel available

Installation
Shipped completely assembled. Set in place and hook up power supply.

Engineering
Custom engineered, computer designed units are available. Contact us for more information.

Options
- Custom shelves, carts + trucks made to accompany any style oven
- Exhaust vent with damper
- Interior door latch
- Outdoor use package
- Chart recorder
- Door switch
- Adjustable timer
- Ethernet or serial bus communication
- Profile temperature control with ramp and hold capability
- Industrially hardened SCADA (supervisory control and data acquisition) system capable of controlling 20 ovens
- Integrated PLC controls with touch screen
- Class “A” oven controls with powered exhaust systems are readily available upon request

Sahara Industrial Batch Ovens offer a range of sizes and heating arrangements to meet a variety of batch heating applications.

Challenge us with your toughest oven applications! Benko Products is not restricted to industrial oven standard model sizes and, instead, will custom build an industrial oven to meet your specifications.
Industrial Ovens

Sahara Industrial Ovens can be designed to meet a variety of Batch processes, including:
- Curing
- Baking
- Drying
- Aging
- Preheating

Available in many convenient arrangements:
- Walk-In
- Truck-In
- Cart Ovens
- Top Loading
- Reach-In / Shelf
- Cabinet

Batch oven with ergonomic tray loading system.

N.F.P.A. Class A Batch Oven

Industrial Ovens

Truck-In Ovens

This electrically heated Truck-In Oven, with 3 roll-in carts, was designed for the automotive industry.

Providing an operating temperature up to 450°F, the oven maintains superior temperature uniformity due to the cross-flow air circulation design.

The carts feature adjustable shelving and heavy duty casters. Double-doors on both ends allow for easier loading and unloading.

Industrial Ovens
Preheat Ovens

Preheating large steel cores of varying sizes (some up to 80' long) posed a few challenges—namely how to load the fragile cores into the oven and how to ensure temperature uniformity.

This custom designed top loading oven with counterbalanced doors made loading easy while electric zone heating made oven operation efficient and temperatures uniform.
Industrial Ovens
Drum / Tote Warming

The 'Sahara Hot Box' Industrial Drum / Tote Warming Oven is designed to heat from 1 to 32 fifty-five gallons drums, or 8 IBC Totes, at the same time.

### Options
- Available with fixed or removable shelving, per customer specifications
- Exhaust vent with damper
- Interior door latch
- Outdoor use package
- Chart recorder
- Door switch
- Adjustable timer
- Ethernet or serial bus communication
- Profile temperature control with ramp and hold capability
- Industrially hardened SCADA (supervisory control and data acquisition) system capable of controlling 20 ovens
- Integrated PLC controls with touch screen
- Class “A” oven controls with powered exhaust systems are readily available upon request
An adhesive manufacturer needed an oven to cure vials of epoxy in cardboard boxes. The temperature uniformity of each box was critical for consistent curing times.

Twelve material temperature sensors with timers were linked to digital temperature controllers to operate the oven. Horizontal air circulation with internal plenums ensured the proper airflow within the oven.

This steam heated curing oven was designed for the rubber industry.

It’s stainless steel construction, horizontal airflow pattern and removable shelves made it ideal for curing thin layers of rubber compound.

Sahara Industrial Drying Ovens offer a range of sizes and heating arrangements to meet a variety of drying applications.

Benko Products is not restricted to industrial oven standard model sizes and, instead, will custom build an industrial oven to your specifications.
Industrial Ovens

This oven was designed to remove moisture from refurbished electric transformers. It's large interior chamber accommodates a variety of load sizes. Heat is delivered via internal plenums from both sides of the oven for uniform operating temperatures. An exhaust blower, with adjustable damper, aids in removing moisture from the oven.

Contact us for more information on a custom solution for your application!
**Heating mediums**

**Electric:**
- 240 or 480 volt, 3 phase is standard voltage
- Alternate voltages available
- PID digital temperature controls with over temperature protection
- Housed in NEMA 12 or NEMA 4 enclosures

**Gas:**
- Direct fired gas systems with integrated controls
- Honeywell flame safety controls

**Steam:**
- Schedule 40 finned tube heating coils rated for saturated steam up to 200 psig
- Includes inverted bucket steam traps
- Temperature controlled via self-acting temperature control package or digital temperature control system with control valves.
- Can be made suitable for use in Class 1, Div 1 areas

**Hot Oil or Hot Water:**
- Finned tube recirculating heating coils require a minimum of 5 gpm flow rate
- Temperature controlled via self acting temperature control package or digital temperature control system with control valves
- Can be made suitable for use in Class 1, Div 1 areas

**Temperature Uniformity**

The design of each Sahara Industrial Oven is centered around temperature uniformity:
- Temperature uniformity is critical to the proper operation of an oven
- Heating process and load placement will dictate the required airflow pattern
- All heaters, blowers, and exhaust systems will be custom designed and integrated to meet the customer’s specific airflow requirements

**Industry Standards**

- The National Fire Protection Association’s Standard NFPA 86 discusses guidelines for the safe operation of industrial ovens and furnaces. All Sahara Industrial Ovens are built to meet these requirements
- Class A ovens are built to meet NFPA 70 and 79 standards for ovens and furnaces
- Ovens can be field-audited to satisfy CSA (via ESA) and UL 508 inspections and certifications

**Refrigeration**

- Refrigeration systems are available to maintain temperatures from room temperature down to 35 degrees F
- Can be incorporated into any oven design

**Spare parts - documentation**

- Spare and replacement parts can be easily matched to any oven
- Most spare parts are kept in stock.
- Detailed records are kept for each oven manufactured by Benko Products, Inc., which includes an "as-built" drawing, model number, and a list of accessory equipment

**Testing and Inspection**

- Each oven is subjected to a stringent 20 point quality inspection
- Each oven is functionally tested for temperature control regularity and temperature uniformity
- All over-current devices are preset to proper load prior to shipping

**Warranty**

- Additional years of warranty protection are available
- All products manufactured by Benko Products, Inc. have a two (2) year warranty (unless otherwise specified) from the date of purchase against defects in workmanship or material. Any part or component, except items covered by warranties of other manufacturers, returned to the factory or service center freight prepaid by the owner, found upon examination by Benko Products, Inc. to be defective or the result of improper workmanship by the factory will be repaired or replaced without charge and returned to the owner freight prepaid. Benko Products, Inc. does not guarantee product capacity if alterations are made.
